Office Action Summary

Application No.

09/303,356

Applicant(s)

BACHMANN ET AL.

Examiner

Tam V Nguyen

Art Unit

2172

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133).
- Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☒ Responsive to communication(s) filed on 06 March 2002.
- 2a) ☐ This action is **FINAL**. 2b) ☒ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

Disposition of Claims

- 4) ☒ Claim(s) 1-20 is/are pending in the application.
- 4a) Of the above claim(s) _____ is/are withdrawn from consideration.
- 5) ☐ Claim(s) _____ is/are allowed.
- 6) ☒ Claim(s) 1-20 is/are rejected.
- 7) ☐ Claim(s) _____ is/are objected to.
- 8) ☐ Claim(s) _____ are subject to restriction and/or election requirement.

Application Papers

- 9) ☐ The specification is objected to by the Examiner.
- 10) ☐ The drawing(s) filed on _____ is/are: a) ☐ accepted or b) ☐ objected to by the Examiner.
- Applicant may not request that any objection to the drawing(s) be held in abeyance. See 37 CFR 1.85(a).
- 11) ☐ The proposed drawing correction filed on _____ is: a) ☐ approved b) ☐ disapproved by the Examiner.
- If approved, corrected drawings are required in reply to this Office action.
- 12) ☐ The oath or declaration is objected to by the Examiner.

Priority under 35 U.S.C. §§ 119 and 120

- 13) ☐ Acknowledgment is made of a claim for foreign priority under 35 U.S.C. § 119(a)-(d) or (f).
- a) ☐ All b) ☐ Some * c) ☐ None of:
1. ☐ Certified copies of the priority documents have been received.
2. ☐ Certified copies of the priority documents have been received in Application No. _____.
3. ☐ Copies of the certified copies of the priority documents have been received in this National Stage application from the International Bureau (PCT Rule 17.2(a)).
- * See the attached detailed Office action for a list of the certified copies not received.
- 14) ☐ Acknowledgment is made of a claim for domestic priority under 35 U.S.C. § 119(e) (to a provisional application).
- a) ☐ The translation of the foreign language provisional application has been received.
- 15) ☐ Acknowledgment is made of a claim for domestic priority under 35 U.S.C. §§ 120 and/or 121.

Attachment(s)

- 1) ☒ Notice of References Cited (PTO-892)
- 2) ☐ Notice of Draftsperson's Patent Drawing Review (PTO-948)
- 3) ☐ Information Disclosure Statement(s) (PTO-1449) Paper No(s) _____
- 4) ☐ Interview Summary (PTO-413) Paper No(s). _____
- 5) ☐ Notice of Informal Patent Application (PTO-152)
- 6) ☐ Other: _____

DETAILED ACTION

Response to Arguments

1. Applicant's arguments with respect to claims 1-20 have been considered but are moot in view of the new ground(s) of rejection.

Claim Rejections - 35 USC § 103

2. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

3. Claims 1-20 are rejected under 35 U.S.C. 103(a) as being unpatentable over Byrne et al. (US 6347312B1) in view of Kennedy (US 6134582).

Re claims 1 and 16, Byrne disclose a method for deleting entries from a directory in which directory information is stored in a set of database stables, comprising the steps of: responsive to a request to delete a directory entry, (col. 4, lines 17-26 and see fig. 1 & 2).

Byrne fails to show tagging the directory entry in a first table.

Kennedy teaches tagging the directory entry in a first table, (col. 11, lines 48-col. 12, lines 7 and see fig. 4A-4K). Therefore, it would have been obvious to one of ordinary skill in the art at the time the invention was made to modify Byrne by including tagging the directory entry in a first table, as taught by Kennedy, so the systems can

remove or modify many entries that have been tagging the directory in the table. In this way, the systems enable management to save time and would not have to worry of any mistaking of deleting the entry, (col. 3, lines 55-col. 4, lines 20).

Kennedy further disclose periodically search for tagged entries in the first table during a cleanup process interval, (col. 11, lines 48-col. 12, lines 8); and deleting references to the tagged entries throughout the set of database tables, (col. 3, lines 55-col. 4, lines 20).

Re claims 2 and 10, Kennedy further discloses wherein the directory entry is tagged by setting its creation time to a given value, (Col. 11, lines 48-Col. 12, lines 8 and Col. 13, lines 33-Col. 14, lines 68)

Re claims 3 and 11, Kennedy further discloses wherein the given value is a null value, (Col. 11, lines 48-Col. 12, lines 8 and Col. 13, lines 33-Col. 14, lines 68).

Re claims 4 and 17, Kennedy further discloses performing a search for directory entries that satisfy a search query, (Col. 13, lines 66-Col. 14, lines 47); and excluding tagged entries from search results that otherwise satisfy the search query, (Col. 21, lines 54-Col. 23, lines 18).

Re claim 5, Kennedy further discloses wherein the step of excluding tagged entries includes modifying an SQL query to exclude rows having null change creation, (Col. 8, lines 51-Col. 9, lines 63).

Re claims 6, 15, 18, and 20, Byrne further discloses the method as described in claims 1, wherein the directory is a Lightweight Directory Access Protocol (LDAP) directory service and the database tables are managed by a relational database management service, (col. 4, lines 18-38).

Re claims 7 and 12, Kennedy further discloses the method as described in claim 1 wherein the first table is an entry table, (Col. 8, lines 51-Col. 9, lines 63).

Re claims 8 and 13, Kennedy further discloses the method as described in claim 7, wherein the set of database tables includes at least one attribute storing information about an attribute, (Col. 8, lines 51-Col. 9, lines 63).

Re claims 9 and 14, Byrne disclose a method for deleting entries from a directory in which directory information is stored in a set of database stables, comprising the steps of: responsive to a request to delete a directory entry, (col. 4, lines 17-26 and see fig. 1 & 2).

Byrne fails to show tagging the directory entry in a first table.

Kennedy teaches tagging the directory entry in a first table, (col. 11, lines 48-col. 12, lines 7 and see fig. 4A-4K). Therefore, it would have been obvious to one of ordinary skill in the art at the time the invention was made to modify Byrne by including tagging the directory entry in a first table, as taught by Kennedy, so the systems can remove or modify many entries that have been tagging the directory in the table. In this way, the systems enable management to save time and would not have to worry of any mistaking of deleting the entry, (col. 3, lines 55-col. 4, lines 20).

Kennedy further disclose responsive to a search for directory entries that satisfy a search query, excluding tagged entries from search results that otherwise satisfy the search query, (Col. 13, lines 66-Col. 14, lines 47 and Col. 21, lines 54-Col. 23, lines 8); periodically searching for tagged entries in the first table during a cleanup process interval, (Col. 11, lines 48-Col. 12, lines 8 and Col. 13, lines 33-Col. 14, lines 68); and deleting references to the tagged entries throughout the set of database table, (Col. 11, lines 48-Col. 12, lines 8 and Col. 13, lines 33-Col. 14, lines 68).

Re claim 19, Byrne discloses a directory service, comprising: a directory organized as a naming hierarchy having a plurality of entries each represented by a unique identifier, (col. 4, lines 18-38); a relational database management system having a backing store for storing directory data in a set of database entries, (col. 5, lines 4-16);

Byrne fails to show means for deleting entries from the directory, comprising: means responsive to a request to delete a directory entry for tagging the directory entry in a first table.

Kennedy teaches means for deleting entries from the directory, comprising: means responsive to a request to delete a directory entry for tagging the directory entry in a first table, (col. 11, lines 48-col. 12, lines 7 and see fig. 4A-4K). Therefore, it would have been obvious to one of ordinary skill in the art at the time the invention was made to modify Byrne by including means for deleting entries from the directory, comprising: means responsive to a request to delete a directory entry for tagging the directory entry in a first table, as taught by Kennedy, so the systems can remove or modify many entries that have been tagging the directory in the table. In this way, the systems enable management to save time and would not have to worry of any mistaking of deleting the entry, (col. 3, lines 55-col. 4, lines 20).

Kennedy further discloses means for periodically searching for tagged entries in the first table during a cleanup process interval, (Col. 11, lines 48-Col. 12, lines 8 and Col. 13, lines 33-Col. 14, lines 68); means for deleting references to the tagged entries throughout the set of database tables, (Col. 11, lines 48-Col. 12, lines 8 and Col. 13, lines 33-Col. 14, lines 68); and means responsive to a search for directory entries that satisfy a search query for excluding tagged entries from search results that otherwise satisfy the search query, (Col. 13, lines 66-Col. 14, lines 47 and Col. 21, lines 54-Col. 23, lines 8).

Conclusion

4. Any response to this action should be mailed to:

Commissioner of Patents and Trademarks

Washington, D.C. 20231

Art Unit: 2172

or faxed to:

(703)-746-7239 (**formal** communications intended for entry),

Or:

(703)-746-7240 (**informal** communications labeled **PROPOSED** or **DRAFT**).

Hand-delivered responses should be brought to:

Sixth Floor Receptionist, Crystal Park II, 2121 Crystal Drive, Arlington, VA.

5. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Tam Nguyen, whose telephone number is (703)-305-3735 and can normally be reached Monday-Friday from 7:30 AM to 5 PM.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Kim Vu, can be reached at (703)-305-4393.

6. Any inquiry of a general nature or relating to the status of this application or proceeding should be directed to the group receptionist whose telephone number is (703)-305-3900.
